

# Amalgam Separator

ISO 11143

## ECOAS04

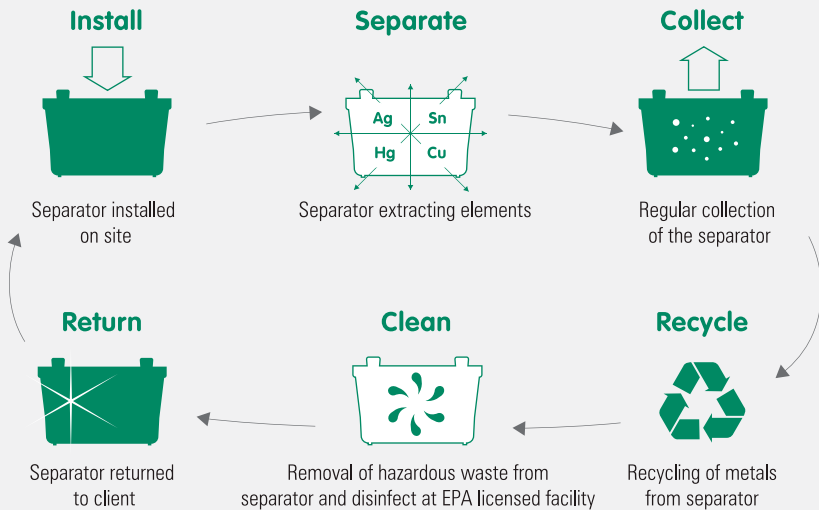

# Amalgam Separator ECOAS04

ECOAS04 is a small and easily installed unit that fits all types of equipment. The box is sealed and 100% recyclable.

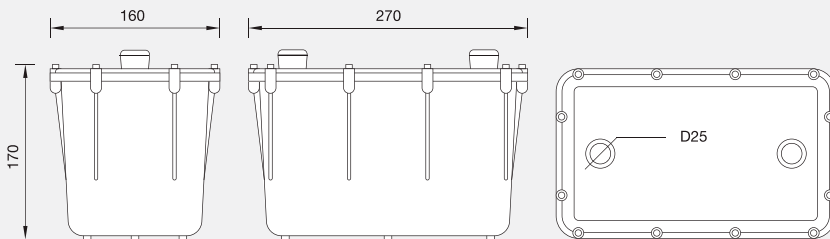

## Integration of ECOAS04 in a central suction system

## Technical data

• Weight (empty): 2.5kg • Tube In / Out: 25mm • Water flow: 6 litres per min • Efficiency: 99.5%

ISO 11143 approved.

**A reliable and unique ecological technology as ECOAS04 is non-electric and has no moving parts.**

ECOAS04 offers a total solution to your amalgam waste problem which includes installation, recycling and waste treatment.

No dental staff needed to handle or clean the separator.

Very efficient according to independent European and American tests which shows separation capacity over 99%.

Environmentally friendly because it's 100% recyclable and does not create new waste.

Hygienically safe, the ECOAS04 is a sealed box.

It is sealed and recycled on a regular basis by our professionally trained staff.

ECOAS04 is based on enhanced sedimentation and electrochemical reaction.

More than a decade of successful marketing in Europe warrants a well proven system.
